Project Scope
Resources Provided

[Project Progress]

At the top of the page, there is a banner to represent the project. It is followed by the project details and buttons to any agreements.

Project Details Page

This page is a copy of the already existing template of the project details page. Each project should have their own details page with information about the project, a list of the people working on the project (and any other relevant information).
We need to add a button which allows someone on the project to send a meeting invitation to other members of the project.

There will be a link on this main details page that will lead to the project progress page (the section of the platform that we will be building)

Everything is Going Well

Minor Issues

Major Issues

Resources Required

This section to the right includes the following:

1. A small picture/ logo to represent the project

2. A "Main objectives and goals" section that the user can edit

3. A status box that can be changed at any time to notify other members of the project (or the supervisor) about how the project is going. It will be very helpful to be able to filter projects based on this selected status.

4. A button the students can press to request resources from the teaching assistants/ supervisor.

Project Progress Page

This is the main page we will be building. We can have the right section fixed on the page so it is always visible. The user will be able to scroll through the left side.

This page includes a list of the tasks being worked on, the gantt chart that the students are following (or perhaps another form of schedule) and the current progress of the team.

At the bottom of the page, the student can see the information related to their biweekly reports. On the left, they can see the current report they are working on. It will either be submitted already, or waiting for submission. On the right, they will have the ability to view previous biweekly reports.

Edit Tasks Page

On this page, the students will be able to edit or delete existing tasks, and add any new tasks. The table can possibly have additional fields (such as priority or due date).
Having features to filter the table may also be useful.
Additionally, tasks may also have an "Overdue" status as well if they have not been completed by the due date.
